Clean Up day meeting points identified

The meeting points relating to the Clean Up Day on 06 June have been identified. These are the sites where residents can obtain bags to collect litter on the day. Pikitup has established Sixty six (66) meeting points across Johannesburg to facilitate the clean up. Residents can go to the meeting point closest to them on 06 June and obtain bags, bins etc. from the Pikitup marshals who will be on hand to advise participants.

In most cases the meeting point will act as a central hub with participants being dispatched in various directions to clean up sites in and around the central meeting point, all within walking distance.

The Clean Up Day is a Pikitup initiative in which the public has been invited to assist Pikitup in cleaning some of the most prominent 'dirty spots' in Johannesburg. It is expected that the cleaning of these sites will be the first step towards facilitating a long-term mindset shift amongst Johannesburg residents and businesses towards littering and illegal dumping, whilst also ridding the City of many of the dirty spots that may be encountered by tourists and the global media during the aforementioned major sporting events when the City will be in the world spotlight.

Pikitup urges residents to bring gloves and dress appropriately for the clean up. Residents can also visit www.pikitup.co.za or call 011 712 5200 to register and for further information on the Clean Up Day.
