

REVAMPED GARDEN SITES

The dire need to drastically reduce waste that ends up at Pikitup's Landfill sites is a collective responsibility.

In an effort to avert such a situation and to foster a culture of waste minimization, Pikitup has converted its garden sites into integrated waste management sites that residents can use to dispose of all kinds of waste as opposed to garden waste only, as was the case before.

Waste acceptable at the site:

- Light garden waste/refuse (maximum five plastic bags)
- Paper, cardboard and plastics
- Cans, e-waste and vehicle oil
- Glass

Old furniture, couches, fridges, microwave ovens, broken television sets, old mattresses are considered bulky waste and these must NOT be disposed at these site. Please note that the integrated waste management sites are self-service sites. Pikitup employees are not obliged to help you offload your refuse.
